

地址: <https://yuugou727.github.io/blog/2018/02/20/html5-pattern/>

创建 form

创建一个包含 input 属性 required 和 submit 属性的 HTML 表单

```
<form>
```

```
<input type="text" required>
```

```
<button type="submit">Send</button>
```

```
</form>
```

在服务器端使用 PHP 的 preg_match() 函数或 JS 的 match() 函数来验证 HTML 表单的 input 属性 submit method 属性。

type 属性 pattern

input 属性 type 属性 number, email, date, time

[]HTML5 input [] pattern []

[] Administrator

[], 27 [] 2021 11:23 -

[] type="email" [] @ [] domain [] .

[] input [] pattern [] . [] type [] text, search, tel, url, email, password [] input [] .
